

Coldwater Landscapes Limited Warranty

Our Green Guarantee

Coldwater Landscapes LLC offers a 90-Day warranty on plant material installed by Coldwater Landscapes LLC that is under irrigation and maintained properly.

Coldwater Landscapes LLC is not responsible for replacing plant material damaged or killed by pests, fungi, diseases, vandalism, or natural events.

Irrigation Parts

All irrigation parts installed by Coldwater Landscapes LLC have a 90-Day warranty for the wholesale purchase price from the date of installation, excluding labor.

A labor fee will be charged for any replacement of parts due to manufacturer's defect. Repairs for faulty workmanship will have no labor charge. Warranty is voided due to acts of mother nature (snow, ice, flood, etc.) or repairs by anyone except Coldwater Landscapes LLC.

Sod Installation

Coldwater Landscapes, LLC does not provide a warranty for sod installation as it is guaranteed to take root unless watering is not done properly. To help remedy errors in watering, we provide clients with proper watering techniques for new sod.

After installation, there is no guarantee of sod being weed-free. When new sod is installed, the disturbed soil may lead to weed seeds germinating, even if the sod has been treated. To remedy this, we recommend scheduling turf management services as a discounted add-on to new sod installation projects.
